### New ConTex-Commentary - issued:

01.08.19

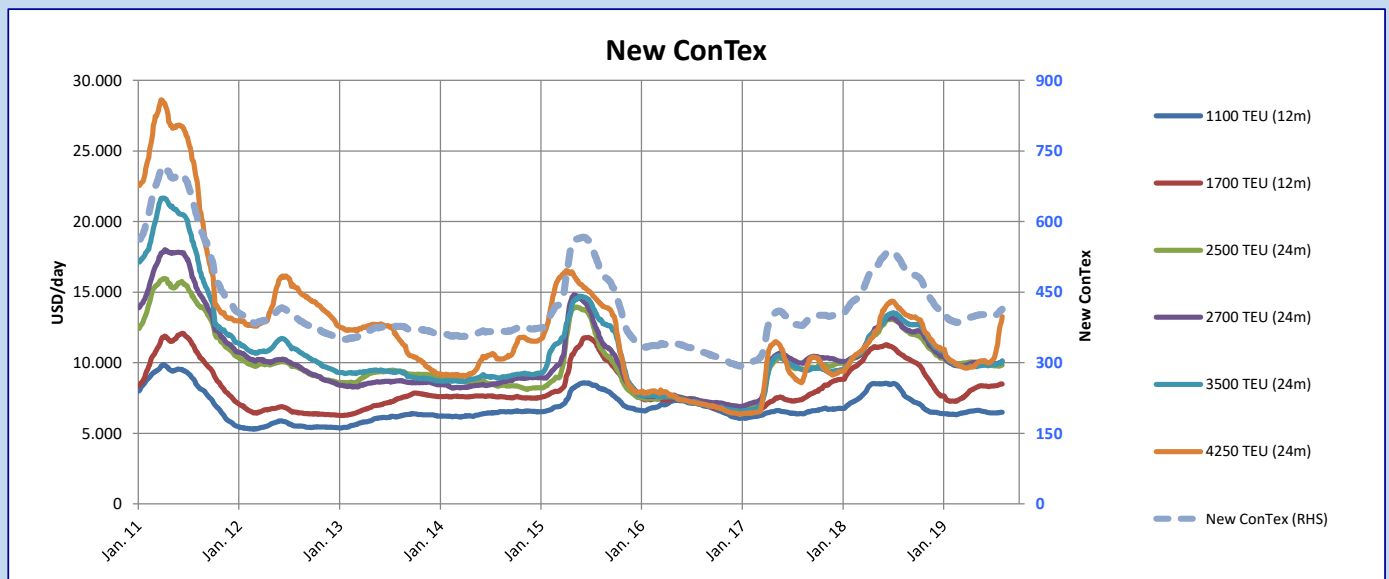

The New ConTex Index continues its recovery although the pace is a little slower than experienced last week, ending this week 3 points up.

Once again it is the 4250 TEUs which are driving the Index with gains of 6.4% basis 12 months employment and 4.9% basis 24 months compared to last week. It is also noticeable that the 3500 TEUs are gaining as demand finally begins to be felt at least to the next size down. The gains for the 3500 TEUs since last week are 2.7% basis 12 months and 1.8% basis 24 months; lower - but still respectable.

As for the smaller feeders their Owners continue to find progress quite challenging in the current market although they can draw some comfort that at least the rates for most sizes are being marked up, even if only slightly.
