Weekly Shipping Market Update

06th - 12th December 2021 | Week 49

Market Analysis

A short breath before the close of the year and we still find that the dry bulk sector has seemingly held its high hopes for the near future. This may be but a mere reflection, as it seems, of the emphatic trajectory that has taken place since the onset of this year. However, could there be a slight undertone of stress in the market? How can we describe the current prevailing sentiment in the market? Positive or mixed? Is there a clear direction? or have the recent market shifts derailed the overall positive view?

The below graph is an attempt to explain some of the above ideas and trends noted in the market as of late. Having used a weighted Relative Strength Index (RSI) derived from all the separate size segments (Capesize, Panamax, Supramax & Handysize) for 5year asset price levels, 1-year period TC rates and spot indices, we see different conclusions being drawn in terms of momentum. For the spot market, the hefty bearish reversal (below the red line) halfway in 4Q21 brought a strong shift in the market and confirmed the hidden downside risks that are always prevalent. More problematic though, has been the steep negative dive taken by the period charter market as well. At first sight, it seems rather reasonable, given this link to the spot market's momentum. However, it also re-affirms the lack of strong confidence in terms of the forward view and the perception that the current market levels are disproportionally weighted by temporary asymmetries rather than robust long-term fundamentals. This is also the case for asset price levels. A few months ago one would argue that asset price levels lag well behind the prevailing market conditions. As shown in the graph, it seems that asset price levels are already under pressure. This could just be an increasing spread between Buyer-Seller price ideas, but even so, it clearly shows how the bullish run of 2021 has lost a fair part of its confidence rather quickly.

The scope of this view is not to argue whether we are on a bullish or bearish trajectory. It is to serve just as a reminder of the challenges to be faced moving forwards. The recent increased concerns over the omicron variant will likely push for increased uncertainty to continue through a little further. Moreover, there also many unknown factors over the global economy, with questions still looming over inflation and interest rates, as well as how all this could trigger further shifts in fiscal and monetary policies sooner rather than later.

Freight Market Dry Bulkers - Spot Market

06th - 12th December 2021

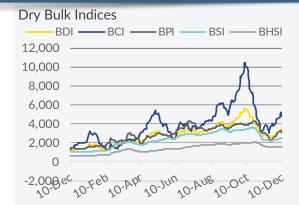

Capesize – The market resumed this past week in a bullish momentum, with the BCI TCA climbing higher at levels above US\$40,000/day (posting a w-o-w rise of 5.1%). Interest was intense in the Atlantic, albeit it lost some steam at the end of the week. At the same time, shorter tonnage lists in the Pacific boosted premiums for owners in the region. A slowdown may be witnessed as we are reaching the year's end, with refreshed demand being expected for the beginning of 2022.

Panamax – In contrast to the Capes, the market here moved downwards this past week. This was reflected in the 1.93% fall noted in the BPI TCA figure, which closed the week at US\$27,610/day. Available tonnage started to build up in the Atlantic basin during the week, as demand was anemic and fixing was limited. The trans-Atlantic round voyage fell by 3.6%. In the Pacific, activity was also unimpressive, but it was able to trim the overall losses.

Supramax – The market continued on positive mode for yet another week, with the BSI TCA rising further to US\$28,065/day this past week. Robust demand for Indonesian coal was able to curb the available tonnage in the Pacific, boosting premiums from charterers. Meanwhile, interest was improved in the Atlantic basin as well last week, with activity being particularly intense in the USG.

Handysize – A small change was seen this past week in the Handysize market. The BHSI TCA figure closed the week at US\$28,295/day, 0.8% higher w-o-w. Activity was robust once again in both the USG and the ESCA regions, enhancing owner sentiment further in the market. In Asia, demand also stood at positive levels this past week.

Freight Market Tankers - Spot Market

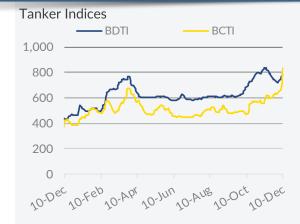

06th - 12th December 2021

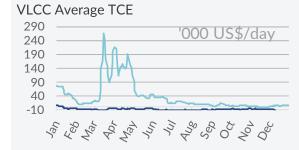

Crude Oil Carriers - The crude oil freight market returned to a positive trajectory this past week, with the BDTI posting a robust rise of 6.5%. Despite the overall positive momentum, the VL sector softened further, as oversupply issues dominated the market once more. In contrast to this, the Suezmaxes posted a strong rebound last week. Demand in the WAF was improved, helping owners to seek higher premiums after a long period of losses. Gains were seen in the Black Sea/MED region as well last week. On the Aframax front, it was also a bullish week with the segment TCE rising by 28.3%. Robust MED and USG markets were the key drivers last week, with gains also being seen on most of the other key routes.

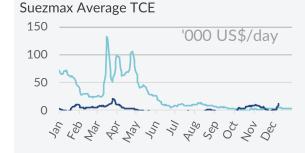

Oil Products - On the DPP front, a robust MED market helped freight rates move upwards, while demand was improved in SEASIA as well. However, gains were curbed from the lack of activity noted in the ARA-USG trade. On the CPP front, it was a very positive week, with a strong rise being witnessed in all key trading routes, both for westbound and eastbound directions.

Sale & Purchase Newbuilding Orders

06th - 12th December 2021

A very active week in the shipbuilding market with several new orders being placed for key segments. In the dry bulk market, interest for newbuilding projects has been vivid for some time now, with ordering activity though having increased only moderately when considering the current demand and supply balance. The most impressive order of last week was the contract for a total of 12 Ultramaxes placed by a Chinese financial leasing firm, while 4 Capes were also ordered by Japanese interests. Recent newbuilding prices have certainly helped trim some of the excess interest in the sector, albeit the biggest factor still seems to be the lack of available interest and slots from the side of shipbuilders. Orders were seen in the tanker sector as well this past week, after a prolong period of inactivity. Expectations for improvements in this market are still on the mind of investors, with current freight earnings and newbuilding prices though still holding back interest for now. Finally, there were several orders for LNG carriers this past week from various interests, pilling on the significant rise in activity that has already been seen this year.

Sale & Purchase Secondhand Sales

06th - 12th December 2021

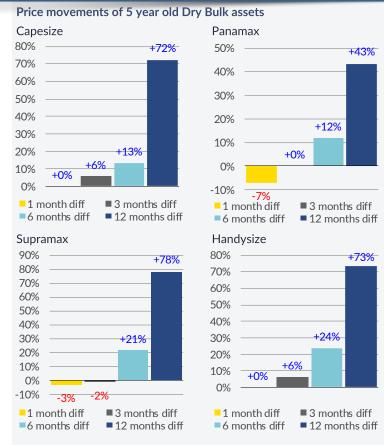

Indicative Dry Bulk Values (US\$ million)

On the dry bulk side, it was a very active week with several deals emerging across different size classes. However, the majority of buying focus was given to the Supramax/Ultramax size class. Sentiment is robust and current freight earnings seem to be relatively sustainable for the time being. Therefore, we expect that SnP interest in this sector will remain vivid over the coming weeks, with asset prices though likely playing a crucial role on the final number of transactions that will take place. A softening in prices has also been observed over these past weeks, though this trend may end up fading.

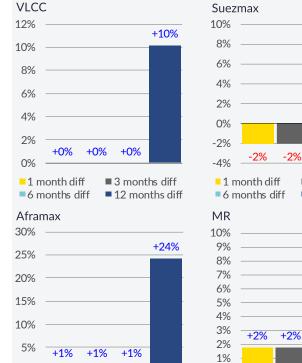

On the tanker side, it was also an interesting week with many transactions being reported in the MR and Aframax sectors. As some signs of a market recovery have started to take shape in the market, buyers seem to have started to flock back to this market. However, these signs of a recovery are still fragile and thus we do not expect activity to ramp up significantly over the coming weeks.

Sale & Purchase Demolition Sales

06th - 12th December 2021

Activity remained for yet another week at moderate levels, with small tanker units still being the main feedstock for the ship recycling market. Interest for demolition in the rest of the main sectors remains subdued as either current market fundamentals are too robust or there are expectations for an improved demand and supply balance to take shape in the near term. Meanwhile, scrap prices seem to have started to lose some steam as of late, trimming interest from the side of owners even further. In particular, activity in Bangladesh was improved, but overall interest remained limited, in contrast to the impressive number of deals noted during the start of the year. Steel plate prices have decreased during the last couple of weeks, inevitably leading to a cut in offered prices. The same softening was witnessed in India as well this past week. Fundamentals are weak and domestic breakers have dropped their interest levels. At the same time, the Indian Rupee also lost some ground this past week. The picture in Pakistan is more or less similar, as interest is limited, while steel prices and the local currency are both on a bearish path. Finally, the situation has not changed in Turkey, despite the continued collapse of the Turkish lira, which for some time now has been a significant negative factor for the country's ship recycling industry.

Greek owner Safe Bulkers has fixed its second sustainability-linked finance package in a deal worth \$100m. The New York-listed company said six of its 46 bulk carriers have been refinanced over five years. Half of the amount is in the form of a term loan and the rest is a reducing revolving credit facility.

The shipowner said the package incorporates a discount or increase on the interest rate depending on its independently verified emissions performance. The proceeds will replace other debt deals worth \$70.4m over shorter periods tied to the same ships. The company does not intend to draw down the full revolver at this point.

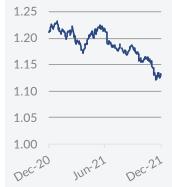

Safe Bulkers president Loukas Barmparis said: "This is the second sustainability-linked refinancing action. "In parallel, the company further reduces its debt, reaching an optimum level by the year-end, while it maintains quick access to capital through the reducing revolving credit facility component," he added. The information contained within this report has been provided by Allied Shipbroking Inc. and Allied Chartering S.A. for general information purposes.

All the information is compiled through Allied Shipbroking Inc. and Allied Chartering S.A. databases, as well as from other market sources. Despite having taken reasonable care in the gathering, filtering and auditing of this information and believing that the information is accurate and correct, it may still contain errors, as a lot of the views regarding market levels are partially derived from estimates and/or subject judgments while the reported transaction activity is gathered from several sources and rumors, some of which are sometimes hard to validate in full their accuracy and truthfulness. As such we advise that the information be taken cautiously, while advising that this information does not obviate the need to also make further enquiries and seek further information in order to obtain a more accurate outlook. As we make no warranties of any kind, both expressed or implied, as to the completeness, accuracy, reliability or completeness of the information herein, Allied Shipbroking Inc. and its connected persons shall not be held liable to any loss or damage of any kind, including direct, indirect and/or consequential damages caused by negligence of any kind on our part.

Any choice to rely on this information provided is strictly at the recipient's own risk.

This report and its information is confidential and solely for the internal use of its recipients, while any re-production or re-distribution of the report and its material is strictly prohibited without prior permission from Allied Shipbroking Inc.

Appendix

Aggregate Price Index quoted on the first page for both Newbuilding and Secondhand relates to the current average prices levels compared to where they stood at 1st January 2010 (i.e. index 100 = 01/01/2010)

Demolition market average price index refers to the combination of the average prices currently offered in the Indian Sub-Continent, Far East and Mediterranean.

Period rates currently relate to Capesize of 180,000dwt, Panamax of 76,000dwt, Supramax of 56,000dwt and Handysize of 33,000dwt on the Dry Bulk side and VLCC of 250,000dwt, Suezmax of 150,000dwt, Aframax of 115,000dwt and MR of 52,000dwt on the Tankers side respectively.

In terms of Secondhand Asset Prices their levels are quoted based on following description:

All vessels built to European specifications by top Japanese shipbuilders, with dwt size based on the below table.

	Resale	5 year old	10 year old	15 year old
Capesize	180,000dwt	180,000dwt	170,000dwt	150,000dwt
Panamax	82,000dwt	82,000dwt	76,000dwt	74,000dwt
Supramax	62,000dwt	58,000dwt	56,000dwt	52,000dwt
Handysize	37,000dwt	32,000dwt	32,000dwt	28,000dwt
VLCC	310,000dwt	310,000dwt	250,000dwt	250,000dwt
Suezmax	160,000dwt	150,000dwt	150,000dwt	150,000dwt
Aframax	110,000dwt	110,000dwt	105,000dwt	95,000dwt
MR	52,000dwt	45,000dwt	45,000dwt	45,000dwt
