New ConTex-Commentary - issued: 12.05.22

Looking at the Indices this week, the most positive thing to report is that we are in a sideways movement...that depresses you? Ruins your weekend ahead? Well, in that case we would recommend to take a look at stock market indices and thereafter, open a cold one and enjoy another good long look at our friend the New ConTex. It could all be worse. Whilst the Month-on-Month figure shows a drop in the New ConTex by 8,7%, we are still up Year-on-Year by 131,7%. Activity this week was mainly focused on the Feeder sizes and, although such activity was rather lacklustre, might be a sign that the feeder market will recover a little bit of the ground lost in April. The larger sizes were rather inactive, which, however, is also rooted in very little positions being available. With the rate environment being more or less stable, the battleground for the market still seems to be period length, with Owners willing to look at either ultrashort or very long period, whilst on the latter, Charterers are still putting up resistance. High Inflation, the unprovoked Russian attack on Ukraine, Chinese COVID lockdowns and the supply chain crunch will provide us with quite enough reasons for excitement, however market conditions for Container Charter rates should, garnished with a little volatility, remain stable for the next few months.
