## IRON ORE SEABORNE INDEX (IOSI)

## MARKET COMMENTARY

Sep 20th, 2022		CFR Qingdao, USD/dry tonne						
Index	Fe Content	Price	Change	Change %	MTD	YTD	Low <sup>2</sup>	High <sup>2</sup>
IOSI62	62% Fe Fines	100.44	-2.66	-2.58%	107.49	131.27	93.75	159.45
IOSI65	65% Fe Fines	110.55	-0.15	-0.14%	118.03	152.47	102.05	185.82

DCE iron ore futures declined by 3.06% today, the main contract closed 696. Some traders were general attitude to sell. More steel mills tended to wait and see, and purchasing enthusiasm is not high. Total transactions returned to positive. PBF at Shandong port dealt 744-750 yuan/mt; decreased 10 yuan/mt than last week. PBF at Tangshan port dealt 755-765 yuan/mt. On the macro side, the PBOC released the LPR quotation for September today, and the 1-year and 5-year interest rates remained unchanged. The market mentality was temporarily stable. The news that the Federal Reserve raised interest rates on Thursday may consume market confidence in advance, and the bearish sentiment of the market increased. At present, the profits of steel plants are still on the edge of profit and loss, the enthusiasm for production is relatively general, and the demand for raw materials has not increased significantly. In addition, the overseas mines are operating normally. After the shipment was reduced last week, the shipment was increased, and the port inventory may be accumulated this week. In the short term, the demand in the peak season is still to be verified, and the upward support of the mineral price is insufficient. It is expected that the mineral price

## IRON ORE DOMESTIC CONCENTRATE INDEX CALCULATION METHODOLOGY

The compilation method for price index generally refers to the compilation method of CPI price index and other price indices, breakdown the price data and calculate the average value according to a certain method, taking the vertical axis as the regional composite index (average of different grade index) and the horizontal axis as the grade composite index (average of different regional index), a total composite index for domestic ore can be output ultimately. The process system is also adopted in the calculation i.e. each sub-index can be obtained as well.
